

# Abdulhakeem Temitope Akinola

Product Designer • Web Developer • Aspiring AI Engineer
Ilorin, Kwara, Nigeria | 08067516582 | 08032232797 | Attaqwalaundry@gmail.com

## Professional Profile

Passionate and developing technology professional with hands-on interests in web development, UI/UX design, digital transformation, and practical problem solving. Combines business operations experience with a growing ability to design and build useful digital products. Currently seeking internship, junior, or entry-level opportunities to gain practical industry experience and contribute to meaningful projects.

## Core Skills

UI/UX Design (Figma, user research, information architecture, user flows, interface design) • Web Development (HTML, CSS, JavaScript, responsive design, basic Python) • Product Thinking (problem framing, journey mapping, prioritization, concept development) • Business & Operations (customer service, inventory management, process improvement, order coordination) • Digital Tools (Microsoft Office, Google Workspace, internet research, digital communication)

## Professional Experience

**Founder / Operations Manager — Attaqwa Laundry & Dry Cleaning Services**
Manage day-to-day business operations, customer service, order coordination, garment-care quality, pickups and deliveries, staff workflow, inventory, and service improvement. This real operational experience informs my product and service design thinking.

## Selected Projects

**Tranq — Smart Laundry, Garment Tracking & Logistics Platform**
Research-led product concept focused on digitizing the laundry lifecycle in Nigeria. Contributed to product design and UX thinking around garment inventory tracking, QR-based garment identification, customer and laundry-owner workflows, marketplace discovery, and logistics visibility.

**Tranq AI Assistant — Concept**
Exploring assistant workflows, knowledge boundaries, support intents, and the distinction between static help content and verified live order data.

**ASKMAP Stack Concept**
A concept focused on helping people learn, build, connect, and grow through practical technology education, digital skills, startup support, mentorship, and community.

## Education & Professional Development

Continuous hands-on learning through practical web development, Python programming, UI/UX design, product thinking, and project-based practice. Currently developing stronger AI engineering skills across LLM APIs, RAG, tool calling, vector databases, evals, and guardrails.

## Career Objective

To grow into a well-rounded digital professional who can combine design, technology, and problem-solving to create simple, accessible, responsive, and useful digital solutions. I am particularly interested in opportunities that provide

mentorship, practical project experience, collaboration, and continuous learning.
